THOUSANDS

STATISTICS OF INCOME—CALENDAR YEAR 1920.

TREASURY DEPARTMENT,
OFFICE OF COMMISSIONER OF INTERNAL REVENUE,
Washington, D. C., Sept. 20, 1922.

Hon. A. W. MELLON,
Secretary of the Treasury.

SIR: I have the honor to transmit the following statistical report of economic data compiled from the returns of individuals, corporations, and partnerships reporting net income for the calendar year ended December 31, 1920. There are also included herein tables prepared from capital stock tax returns, 1922, and Federal estate tax returns, 1916-1921.

RETURNS FILED.

The number of individuals who filed income-tax returns for the calendar year ended December 31, 1920, was 7,259,944. The aggregate net income reported by these returns was \$23,735,629,183, and the tax (normal tax and surtax) amounted to \$1,075,053,686. As compared with 1919, the above figures show a growth of 1,927,184 in the number of returns filed and an increase in the total net income reported amounting to \$3,876,137,735, but a decrease of \$194,576,418 in the total tax.

The number of corporation income-tax returns for the calendar year 1920, other than those of personal service corporations, was 345,595. Of these, 203,233 reported net income amounting to \$7,902,654,813; income tax, \$636,508,292; war-profits and excess-profits tax, \$988,726,351; total tax, \$1,625,234,643.

For the calendar year 1919 the number of corporation returns was 320,198, of which 209,634 reported net income totaling \$9,411,418,458 and tax aggregating \$2,175,341,578.

The aggregate net income and tax reported for each of the years 1917-1920, inclusive, in the returns filed by individuals and corporations are as follows:

Year.	Net income.	Increase or decrease.	Income and profits tax.	Increase or decrease.
1917.....	\$24,382,743,418	-----	\$2,833,938,723	-----
1918.....	24,286,150,604	- \$96,592,814	4,286,486,257	\$1,452,547,534
1919.....	29,270,909,906	4,984,759,302	3,444,971,682	- 841,514,575
1920.....	31,638,283,996	2,367,374,090	2,700,288,329	- 744,683,353

PERSONAL INCOME-TAX RETURNS.

In the following table is visualized the distribution of the personal returns by States and Territories, as well as the per capita income and tax, according to the population reported by the Fourteenth Census of the United States, 1920. As relating to the entire population of the United States subject to Federal income tax, the proportion filing returns was 6.85 per cent. The per capita net income reported was \$223.87 and the per capita income tax was \$10.14.

On the basis of returns filed, the average net income reported for 1920 was \$3,269.40, the average amount of tax \$148.08 and the average tax rate 4.53 per cent.

Personal returns, by States and Territories, and per capita distribution, calendar year 1920.

CLASSIFICATION BY SEX AND FAMILY RELATIONSHIP (PERSONAL RETURNS).

The following table shows the distribution of the personal returns according to family relationship:

Distribution of personal returns, by sex and family relationship, calendar year 1920.

Status of family relationship.	Returns.		Net income.	
	Number.	Per cent.	Amount.	Per cent.
Joint returns of husbands and wives, with or without dependent children, and of husbands whose wives, though living with them, filed separate returns.....	3,775,261	52.02	\$14,983,746,394	63.15
Wives making separate returns from husbands.....	77,558	1.06	534,840,405	2.25
Heads of families, men.....	474,374	6.53	1,384,463,654	5.83
Heads of families, women.....	132,151	1.82	388,364,530	1.64
All other, men.....	2,256,565	31.09	4,886,603,493	20.59
All other, women.....	503,690	6.94	1,264,955,727	5.33
Community property income.....	40,115	.54	287,654,980	1.21
Total.....	7,259,944	100.00	23,735,629,183	100.00

INCOME EXEMPT FROM NORMAL TAX (PERSONAL RETURNS).

The amount of net income free from normal tax on account of personal exemptions, dividends, and interest on Government obligations not wholly exempt from tax, is shown in the following table:

Net income exempt from and amount subject to normal tax, personal returns, calendar year 1920.

Status of income.	Amount.	Per cent of total net income.
Net income exempt from normal tax:		
Personal exemptions.....	\$12,834,684,529	54.07
Dividends.....	2,735,845,795	11.52
Interest on Government obligations not wholly exempt from tax.....	61,549,572	.26
Total.....	15,632,079,896	65.85
Net income subject to normal tax.....	8,103,549,287	34.15
Total net income.....	23,735,629,183	100.00

SERVICE, BUSINESS, AND PROPERTY AS SOURCES OF INCOME (PERSONAL RETURNS).

In the table immediately following is shown the distribution of the net income reported according to its origin, that is, whether from personal service or from property.

Distribution by sources, personal income, calendar year 1920.

Source of income.	Amount.	Per cent of total income.
Personal service:		
Salaries, wages, commissions, bonuses, directors' fees, etc.....	\$15,270,373,354	57.21
Business, trade, commerce, partnerships, farming, and profits from incidental sales of real estate, stocks, bonds, and other property.....	5,927,327,538	22.21
Total.....	21,197,700,892	79.42
Property:		
Rents and royalties.....	1,047,423,738	3.92
Interest on bonds, notes, etc.....	1,709,299,428	6.41
Dividends.....	2,735,845,795	10.25
Total.....	5,492,568,961	20.58
Total income.....	26,690,269,853	100.00
General deductions.....	2,954,640,670	11.07
Net income.....	23,735,629,183	88.93

SOURCES OF INCOME AND DEDUCTIONS BY INCOME CLASSES (PERSONAL RETURNS).

The distribution of income from service and business and from property, as well as the total deductions in each income class, are shown in the following table. This table also shows the proportion of the total income reported from each source, as well as the per cent of general deductions and net income to total income for each income class.

Distribution by sources of income and deductions, by income classes, calendar year 1920

Income classes.	Income from personal service and business.	Per cent of total income in each class.	Income from property.	Per cent of total income in each class.
\$1,000 to \$2,000.....	\$3,887,405,835	90.88	\$390,235,085	9.12

INCOME FROM BUSINESS (PERSONAL RETURNS).

The income reported by individuals as having been derived from business, other than from partnerships or personal service corporations, is shown according to industrial divisions in the following table. These data represent only such amounts reported by individuals as were derived from business operations conducted as sole proprietors and do not necessarily indicate the principal occupations of, or the total income reported by, the persons making the returns.

Income reported from business pursuits, personal returns, calendar year 1920.

Industrial groups.	Number of businesses reported.	Per cent.	Net income.	Per cent.
Agriculture and related industries.....	271,805	28.19	\$637,425,239	19.89
Mining and quarrying.....	5,276	.55	36,849,969	1.15
Manufacturing:				
Food products, liquors, and tobacco.....	12,056	1.25	45,699,342	1.43

Trade.....	223,931	23.23	840,755,663	26.23
Public service—professional, amusements, hotels, etc....	269,045	27.91	952,773,878	29.72
Finance, banking, insurance, etc.....	45,082	4.67	182,417,786	5.69
Special cases—business not sufficiently defined to be classed with any other division.....	36,659	3.80	117,760,349	3.67
Grand total.....	964,123	100.00	3,205,555,387	100.00

PARTNERSHIPS AND PERSONAL SERVICE CORPORATIONS.

The revenue act of 1918 prescribes that neither the returns filed by partnerships nor personal service corporations be taxable, but that such income shall be reported for taxation in the returns of net income of the individual members or stockholders, according to their distributive shares, whether distributed or not.

The number of returns of net income for 1920 filed by these two forms of association was:

Partnerships.....	240,767
Personal service corporations.....	5,542
Total.....	246,309

CORPORATION INCOME-TAX RETURNS.

The table immediately following shows the returns of corporations distributed by industrial groups and segregated according to those reporting net income and those reporting no net income. In the transportation and public utility group, both gross income and general deductions should be approximately twice as much as shown. This is due to railroad and other utility corporations, to a great

extent, reporting on the face of the return merely the amount of net income or deficit.

To have inspected the numerous supporting schedules of these returns for the purpose of compiling the gross income and general deductions was inexpedient, due to the cost and the additional time that it would have required.

Distribution of corporations by industrial groups and into those reporting net income and those reporting no net income, calendar year 1920.

Industrial groups.	Total number of corporations reporting.	Corporations reporting net income.				
		Number.	Per cent reporting net income.	Gross income.	Total deductions.	Net income.

INCOME RETURNS BY STATES.

COMBINED PERSONAL AND CORPORATION INCOME AND TAX.

The following table exhibits by States and Territories the combined personal and corporation incomes and income taxes for the calendar year 1920. The amounts do not represent, however, what may be called the geographical distribution of income. The figures are compiled from the returns filed in each State. An individual files his income-tax return in the district in which his legal residence or prin-

principal place of business is located, and a corporation files its income-tax return in the district in which its principal place of business or the principal office or agency is located. Consequently, income reported by an individual or corporation in one State may have been derived from sources in other States.

From the foregoing it will be clear that there is no way of ascertaining from the income-tax returns the amount of income earned in the respective States or the amount of tax paid on that basis.

Personal and corporation income and tax by States and Territories, calendar year 1920.

States and Territories.	Net income.				Tax.

¹ Does not include net income reported by personal service corporations; the net income of such concerns is included in personal returns.

INCOME FROM FOREIGN INVESTMENTS AND RETURNS OF ALIENS.

The income of American citizens and corporations from business and investments in foreign countries and conversely the income of aliens, resident and nonresident, as well as alien corporations from investments and business in the United States, as reported in the returns of net income for the calendar year ended December 31, 1920, is shown below. The data relative to individuals represent only the information contained in returns reporting net income of \$5,000 and over.

Income from sources within the United States and its possessions.

Aliens and foreign corporations.	Number of returns.	Total net income.	Federal income tax.
Nonresident aliens.....	2,409	\$49,777,655	\$9,716,771
Resident aliens.....	8,968	88,421,513	7,839,606
Foreign corporations in business or holding investments in the United States.....	1,055	10,250,031	3,509,485

¹ Compiled from returns reporting net incomes of \$1,000 and over.

² Compiled from returns reporting net incomes of \$2,000 and over.

³ Compiled from returns reporting net incomes of \$3,000 and over.

⁴ A minus sign (-) indicates decrease.

In the study of the above table it should be observed that in 1920, 1919, 1918, and 1917 the figures for each source of income are the positive gain items reported, and represent the gross income, less losses and other deductions applicable to each source. Wherever schedules within the returns showed net losses, such losses are included in general deductions, which represent in addition to these losses such other deductions as were not chargeable to any of the sources of income.

The source of income items for 1916 represent gross income, the deductions not having been allocated to the several sources, but reported in lump sum in the returns under the heading "General deductions."

Corporation returns, number filed for calendar years 1920, 1919, 1918, 1917, and 1916, by States and Territories.

¹ Annual Report of Commissioner of Internal Revenue for fiscal year ended June 30 immediately following the year shown above.

² Includes excise tax, \$10,071,077, act of Aug. 5, 1909.

CAPITAL STOCK TAX RETURNS.

Data compiled from the "Capital stock tax returns for 1922," filed as of July 1, 1921, are presented in the following tables. The same general industrial grouping is used as for the statistics compiled from the returns of net income filed by corporations. The data represent information as reported by 326,100 out of approximately 345,000 returns.

In each of the several tables the number of returns falling under the various classifications are shown, together with the aggregate par value of the common stock, the preferred stock, and the total par value of the common and preferred stock; likewise the fair average value of the capital stock. The law provides that the tax shall be measured by the fair average value of the capital stock of a corporation as of the year immediately preceding the taxable period. In the returns used in this compilation, the fair value is reported for the year, July 1, 1920, to June 30, 1921. The fair average value of capital stock as reflected in these tables is not comparable with invested capital as required for the purpose of the excess-profits tax.

The fair average value of capital stock contemplates the value of the total outstanding stock of the corporation considered as a going concern, and in estimating such value due consideration is given to the net value of the assets, earning capacity, market value of the shares, and other factors that may materially affect values in a given corporation or industry, whereas invested capital for the purpose of the excess-profits tax is based upon the actual investment of the

stockholders in the corporation, irrespective of the present value of the assets.

The tables also show the amount of taxable fair value under each distribution, which is computed by deducting the specific exemption of \$5,000 for each taxable corporation plus the amount of fair value reported by tax-exempt corporations.

The magnitude of corporate industry and the relative importance of each industrial group is clearly shown in Table 1. Of the aggregate fair value of \$75,500,000,000 the manufacturing group reports approximately \$30,500,000,000 or 40 per cent; the next highest is finance, banking, insurance, etc., with \$13,700,000,000 or 18 per cent, followed by transportation and other public utilities, representing \$11,400,000,000 or 15 per cent, after which comes mining and quarrying, \$6,700,000,000 or 9 per cent. The agriculture group reports only \$1,000,000,000 or $1\frac{1}{3}$ per cent. The largest minor division of the major industrial groups is the manufacturing of metal and metal products, whose aggregate fair value totals in round numbers \$10,500,000,000, representing almost 14 per cent of the aggregate fair value reported by all the returns tabulated.

Table 2 supplements the preceding table and shows in percentages the ratios of the common, the preferred, and the fair value of the capital stock to the total par value of the capital stock, both in the aggregate and by industrial groups and exhibits the relative position of the various industrial divisions with respect to the par value and the fair value of their capital stock. Leading in this respect are the life-insurance companies with a ratio of 273 to 100; this is immediately followed by the group of accident, fire, and marine insurance companies reporting 272 to 100. The "All other insurance" group shows 236 to 100. (For the insurance groups, however, a disproportionately high ratio of the fair value to the par value of the stock is shown, due to mutual or nonstock organizations having been included in the tabulation.) The next in order are the trust companies with 233 to 100, followed by national banks, 209 to 100, and State banks 155 to 100. Lowest in order are the electric railway group with a ratio of 31.75 in fair value to each 100 par value of capital stock.

In the consideration of these data in determining the relationship of the fair value to the par value of the capital stock, the abnormal financial conditions of the period July 1, 1920, to June 30, 1921, should be kept in mind.

Table 3 shows the distribution of the returns according to the size of corporation based on fair value of the capital stock and Table 4 shows the distribution by States and Territories.

The tabulations do not contain returns reporting capital stock with "No par value" and the data are as originally filed and prior to audit and adjustment.

Capital stock tax returns—Distribution by industrial groups, showing capital stock, fair value, and tax.

FEDERAL ESTATE TAX RETURNS.

There are given below tables prepared from the estate-tax returns filed during the period from September 9, 1916, the effective date of the original estate-tax law, up to and including January 15, 1922, the date as of which this statistical analysis was made.

It should be noted that the tables are based on returns actually filed within this period as distinguished from the number of taxable estates in which the decedents died during this period. This distinction arises from the fact that estate-tax returns are not due until one year after death, and, while returns are frequently filed in advance, it results that relatively few returns for decedents dying in the calendar year 1921 had been filed on January 15, 1922.

The estate tax is a tax imposed on the transfer of the net estate of a decedent and is graduated according to the size of the net estate.

In the case of a resident decedent the net estate is the gross estate less the deductions indicated in the table, which include in each case a specific exemption of \$50,000, so that in effect the gross estate of a resident decedent must exceed the specific exemption of \$50,000 plus all other deductions before any tax can result. Returns must be filed for all resident estates where the gross estate exceeds \$50,000. The net estate in the case of a nonresident decedent is the gross estate situated within the United States less the proportionate deductions specified by the statutes. The specific exemption of \$50,000 does not apply to the estates of nonresident decedents, and returns must be filed in all cases where there is property situated within the United States.

The size of the net estate as given in the first column of the tables corresponds to the successive taxable blocks as fixed by the revenue acts.

Federal estate tax returns—Returns of resident decedents distributed by size of net estate.

[Returns filed from Sept. 9, 1916, to Jan. 15, 1922.]

Size of net estate.	Number of returns.	Gross estate.	Specific exemption.	Deductions.				Net estate. ¹	Tax.	Average amount of tax per return.	Average rate per cent of tax.
				Charitable, public, and similar bequests.	Property from estates taxed within 5 years.	Funeral and administrative expenses, debts, unpaid mortgages, etc.	Total.

¹ The above returns are included in the distribution shown in Table 1.

² Net taxable estate.

On the pages immediately following will be found the basic tables of income distribution in the United States and in each State and Territory.

Respectfully,

D. H. BLAIR,
Commissioner of Internal Revenue.

Approved: September 21, 1922.

A. W. MELLON,
Secretary of the Treasury.

1 Interest on Government obligations not wholly exempt from tax.

TABLE 2.—PERSONAL RETURNS—DISTRIBUTION, BY INCOME CLASSES, FOR THE UNITED STATES, showing for each class of income the number of returns, net income, personal exemption, dividends, tax paid, and percentages.

[Income returned for the calendar year ended Dec. 31, 1920.]

Income class.	Number of returns.	Net income.	Exemptions from normal tax.			Normal tax.	Surtax.	Total tax.	Average amount of tax per individual.	Average rate of tax per cent.
			Personal exemptions.	Dividends.	Interest on Government obligations. ¹

¹Nontaxable. Personal exemption and dividends exceed net income.

²Classes grouped to conceal net income and identity of taxpayers.

The following table shows the population of the United States from 1790 to 1890. The population increased from 3,929,214 in 1790 to 62,946,562 in 1890. The increase was most rapid between 1840 and 1860, and again between 1870 and 1890.

Year	Population
1790	3,929,214
1800	3,959,829
1810	5,308,482
1820	9,637,801
1830	12,866,014
1840	17,069,453
1850	23,191,876
1860	31,443,321
1870	38,558,371
1880	50,189,326
1890	62,946,562

The population of the United States has increased rapidly since 1840, and is expected to continue to increase for many years to come. The increase is due to a number of factors, including immigration, a high birth rate, and a decrease in the death rate.
